

Young Adult Lit Intro

Morgan Dyke

What is Young Adult Lit?

It is a genre of literature that was made for young adults (teens)

There are lots of novels that contain very deep themes in this genre, but it is still understandable to a “young adult”

The themes in these novels can be related to one’s personal life, or someone they know.

Famous YA Author

John Green is a well-known author in this genre. He writes a lot of realistic fiction type books.

I really enjoy his books

My reading habits

- I like to read in a place where it is quiet, or when I am at the beach (or by the pool)
- I enjoy reading in the summertime when I have more time
- I really only read for English classes during the school year, but they tend to be really good books, and I get really into them.

Reading when I was a child

I loved reading when I was younger. In school when they had reading competitions, I would be really into them and try to win, so I would read a lot. I was in one of the higher reading levels for the longest time because I liked to read so much. That kind of leveled off in middle school when I had less time to read at home.

My personal reading interests

I really like reading about dystopian communities. I think it's interesting reading about how other communities behave in these novels compared to the real world. I like thinking about "what if I were in that situation, and how would I handle that problem if that's what my world was like?"

I also really enjoy reading realistic fiction books because I can relate to one character or another in it usually.
