

YA lit introduction

Ashley Buckley

Young adult literature is aimed mostly for teenagers. A lot of the books are about high school age experiences. A lot of people consider it to just be young romance novels but there's a lot more to this genre than just that.

Young adult literature has arguably existed since the 1930s yet some would say it wasn't an actual genre until about the 1980s. People were slow to accept the movement mostly because they felt the novels encouraged young people to defy society.

Popular young adult literature authors :

John Green (The Fault in Our Stars, Paper towns, Looking for Alaska etc.)

Suzanne Collins (The Hunger Games etc.)

J.K. Rowling (Harry Potter etc.)

Stephenie Meyer (Twilight)

Angie Thomas (The Hate U Give etc.)

I try to make time to read but if i'm being honest it doesn't happen much. When I do read I usually read books that were made into movies because I really like movies. I think my favorite book series would have to be the Twilight books written by Stephenie Meyer. I like the romance genre but also dystopian action as well. I enjoy books like Divergent written by Veronica Roth and The Maze Runner Written by James Dashner.
